Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8,11,12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Green (2045987).

Regarding Claims 8,11,12 and 14, Green shows in Figures 1-4, an antenna formed as a closed loop defined as first L-shaped section, e.g., in Fig. 1, between "U" and "S" and a second L-shaped section between "A" and "C" with two adjoining sections joining the first and second sections, and a tap (at U) connected to the first section, and having identical widths, all arranged as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9,10 and are rejected under 35 U.S.C. 103(a) as being unpatentable over Green (2045987) in view of Maeda et al. (6008766).

Regarding Claims 9,10 and 15-18, the antenna conductors in Green do not appear to be printed. Thus, Maeda is cited as resolving the level of ordinary skill in the antenna art and shows printed antenna conductors sized according to frequency and fed at an impedance of 50 ohms. The specific size of the antenna would depend upon frequency-scaling, as is well established in the antenna art and microwave frequencies are included in the basic scaling. A skilled artisan would have printed the antenna of Green on the surface of Maeda for the purpose of providing a flat antenna construction.

Response to Arguments

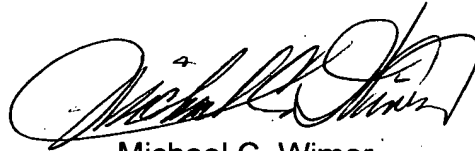

5. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

6. Claims 19-34 are allowed.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.
